TECNOLOGIES

FrontEnd

- HTML
- CSS
- Javascript
- Tailwind CSS
- React
- Typescript

BackEnd

- NextJS
- MySql
- NodeJS
- Express
- API REST

Tools

- Visual Studio Code
- Git
- Github
- Figma

Learning

- Python
- PHP

ABOUT ME

Web developer with hands-on experience working in a company environment as well as building personal projects. At Marketec360, I developed modern and functional web interfaces using Next.js and Tailwind CSS, collaborating in a team and following professional workflows with Git. I've also created personal full-stack projects, including backend APIs with Node.js and relational databases. I'm eager to grow as a full-stack developer and contribute to all stages of the development process.

WORK EXPERIENCE

Marketec 360

Web developer intern

April 2024 – June 2024

- Creation of interactive web pages using Next.js and Tailwind CSS using git and github for version control.

HIGHLIGHTED PROJECTS

DC Wine

- DC Wine is a modern eCommerce platform for a wine shop using Next.js, Tailwind CSS, Firebase for real-time database management, and Stripe for secure payment processing. The platform allows users to easily browse and purchase a variety of wines with a smooth, responsive design, providing a seamless and secure shopping experience.

Task Manager

- A full-stack task management app with drag-and-drop features, task creation/editing, and real-time state syncing. Built with Next.js (Frontend) and Node.js + MongoDB (Backend).

<https://task-manager-theta-seven-97.vercel.app/>

Crematorio Hela

- Crematorio Hela is a modern and responsive web application for a pet crematory service, built with Vite, React, Tailwind CSS, Swiper, and i18n for translations.

<https://crematorio-hela.vercel.app/>

Ally Vision

- React + Vite + TailwindCSS tool to simulate visual impairments. Upload an image, select a condition, and preview how it appears to users with that impairment. Ideal for designers and developers to improve accessibility.
